INTRODUCTION TO MAIRE

A PLATFORM TO ENGINEER ENERGIES FOR THE FUTURE

RESHAPING ENERGIES – 2026-2035 STRATEGIC PLAN

UPDATED WITH Q1 2026 RESULTS

DISCLAIMER

This document has been prepared by MAIRE S.p.A. (the “Company”) solely for use in the presentation of the MAIRE Group (the “Group”) and its financial results.

This document does not constitute or form part of any offer or invitation to sell, or any solicitation to purchase any security issued by the Company.

The information contained and the opinions expressed in this document have not been independently verified. In particular, this document may contain forward-looking statements that are based on current estimates and assumptions made by the management of the Company to the best of its knowledge. Such forward-looking statements are subject to risks and uncertainties, the non-occurrence or occurrence of which could cause the actual results – including the financial condition and profitability of the Group – to differ materially from or be more negative than those expressed or implied by such forward-looking statements. This also applies to the forward-looking estimates and forecasts derived from third-party studies. Consequently, neither the Company nor its management can give any assurance regarding the future accuracy of the estimates of future performance set forth in this document or the actual occurrence of the predicted developments.

Mariano Avanzi, as Executive for Financial Reporting, declares: i) in accordance with paragraph 2, Article 154-bis of Legislative Decree No. 58/1998 (“Consolidated Finance Act”), that the accounting information included in this presentation corresponds to the underlying accounting records, and ii) in accordance with paragraph 5-ter, Article 154-bis of the Consolidated Finance Act, that some of the information on the results relating to sustainability performance indicators included in this presentation corresponds to the information contained in the Group’s Sustainability Report approved.

This document makes use of some alternative performance indicators. The management of the Company considers these indicators key parameters to monitor the Group’s economic and financial performance. As the represented indicators are not identified as accounting measurements according to IFRS standards, the Group calculation criteria may not be uniform with those adopted by other groups and, therefore, may not be comparable.

The data and information contained in this document are subject to variations and integrations. Although the Company reserves the right to make such variations and integrations when it deems necessary or appropriate, the Company assumes no affirmative disclosure obligation to make such variations and integrations.

RESHAPING...

01 THE VISION:
MAKE TO INSPIRE

02 THE OPPORTUNITY:
A RESHAPED ENERGY SCENARIO

03 NEXTCHEM:
THE FUTURE YOU WANT TO SEE

DREAMS ARE IN THE MAKING

05 THE PROGRESS:
CONSOLIDATING GROWTH

06 THE FUTURE:
2026-2035 STRATEGIC PLAN

01

THE VISION: MAKE TO INSPIRE

A HISTORY OF GROWTH, RESILIENCE AND INNOVATION

THE ROOTS

Late 1800s

Edison (1883), Montecatini (1888), and Fiat (1889) are born – Italian pioneers whose engineering legacies shaped MAIRE Group.

1963

Giulio Natta wins the Chemistry Nobel Prize for the invention of polypropylene, thanks to a collaboration with Montecatini.

1971-1973

Selas Italia (1971), later KTI, Fiat Engineering (1972), and Tecnimont (1973) are established.

THE FOUNDATION

1983

Fabrizio Di Amato launches his entrepreneurial project, which over time evolves into MAIRE Group, through M&A and organic growth.

THE GROWTH

2004-2005

MAIRE makes key acquisitions in Italy with **Fiat Engineering** (2004) and **Tecnimont** (Montedison Group, 2005).

2007

MAIRE is listed on the Milan Stock Exchange on 26 November 2007.

2008-2010

MAIRE expands further by acquiring **Tecnimont ICB** (2008), **Stamicarbon** (2009) and Technip KTI, today **KT** (2010).

2011-2017

The Group's turnaround and recapitalization start a new phase of growth with a technology-driven strategy.

THE NEW ERA

2018

Nextchem is born, setting up a clear roadmap towards green chemistry and energy transition.

2021

The launch of MAIRE Foundation aims to drive engineering towards a more humanistic future.

2023

MAIRE adopts a new strategy and organizational structure with two business units and rebrands from Maire Tecnimont.

2023-2025

The acquisitions of **Conser**, **MyRemono**, **GasConTec**, **HyDEP** and **Ballestra**¹ enhance Nextchem's technology portfolio.

1. Announced on 24 December 2025, with consolidation expected from Q2 2026, subject to closing of the acquisition.

TWO ENGINES, ONE HORIZON

A PLATFORM TO ENGINEER ENERGIES FOR THE FUTURE

NEXTCHEM

MAIRE Sustainable Technology Solutions

Selling proprietary low-carbon and circular **technologies**

Short-cycle business (12-18 months)

Reaching new clients globally

High-margin growth driver

TECNIMONT

MAIRE Integrated E&C Solutions

Providing superior **EPC services** in downstream and onshore

Long-cycle business (3-4 years)

Tailored to regional environment

Predictable revenue visibility

OFFERING AN INTEGRATED APPROACH

FROM FEASIBILITY TO PLANT COMMISSIONING

One-stop-shop model

Single point of accountability
reducing complexity for clients

NEXTCHEM
Proprietary technologies

End-to-end delivery

Covering the full value chain,
from feasibility study to plant commissioning

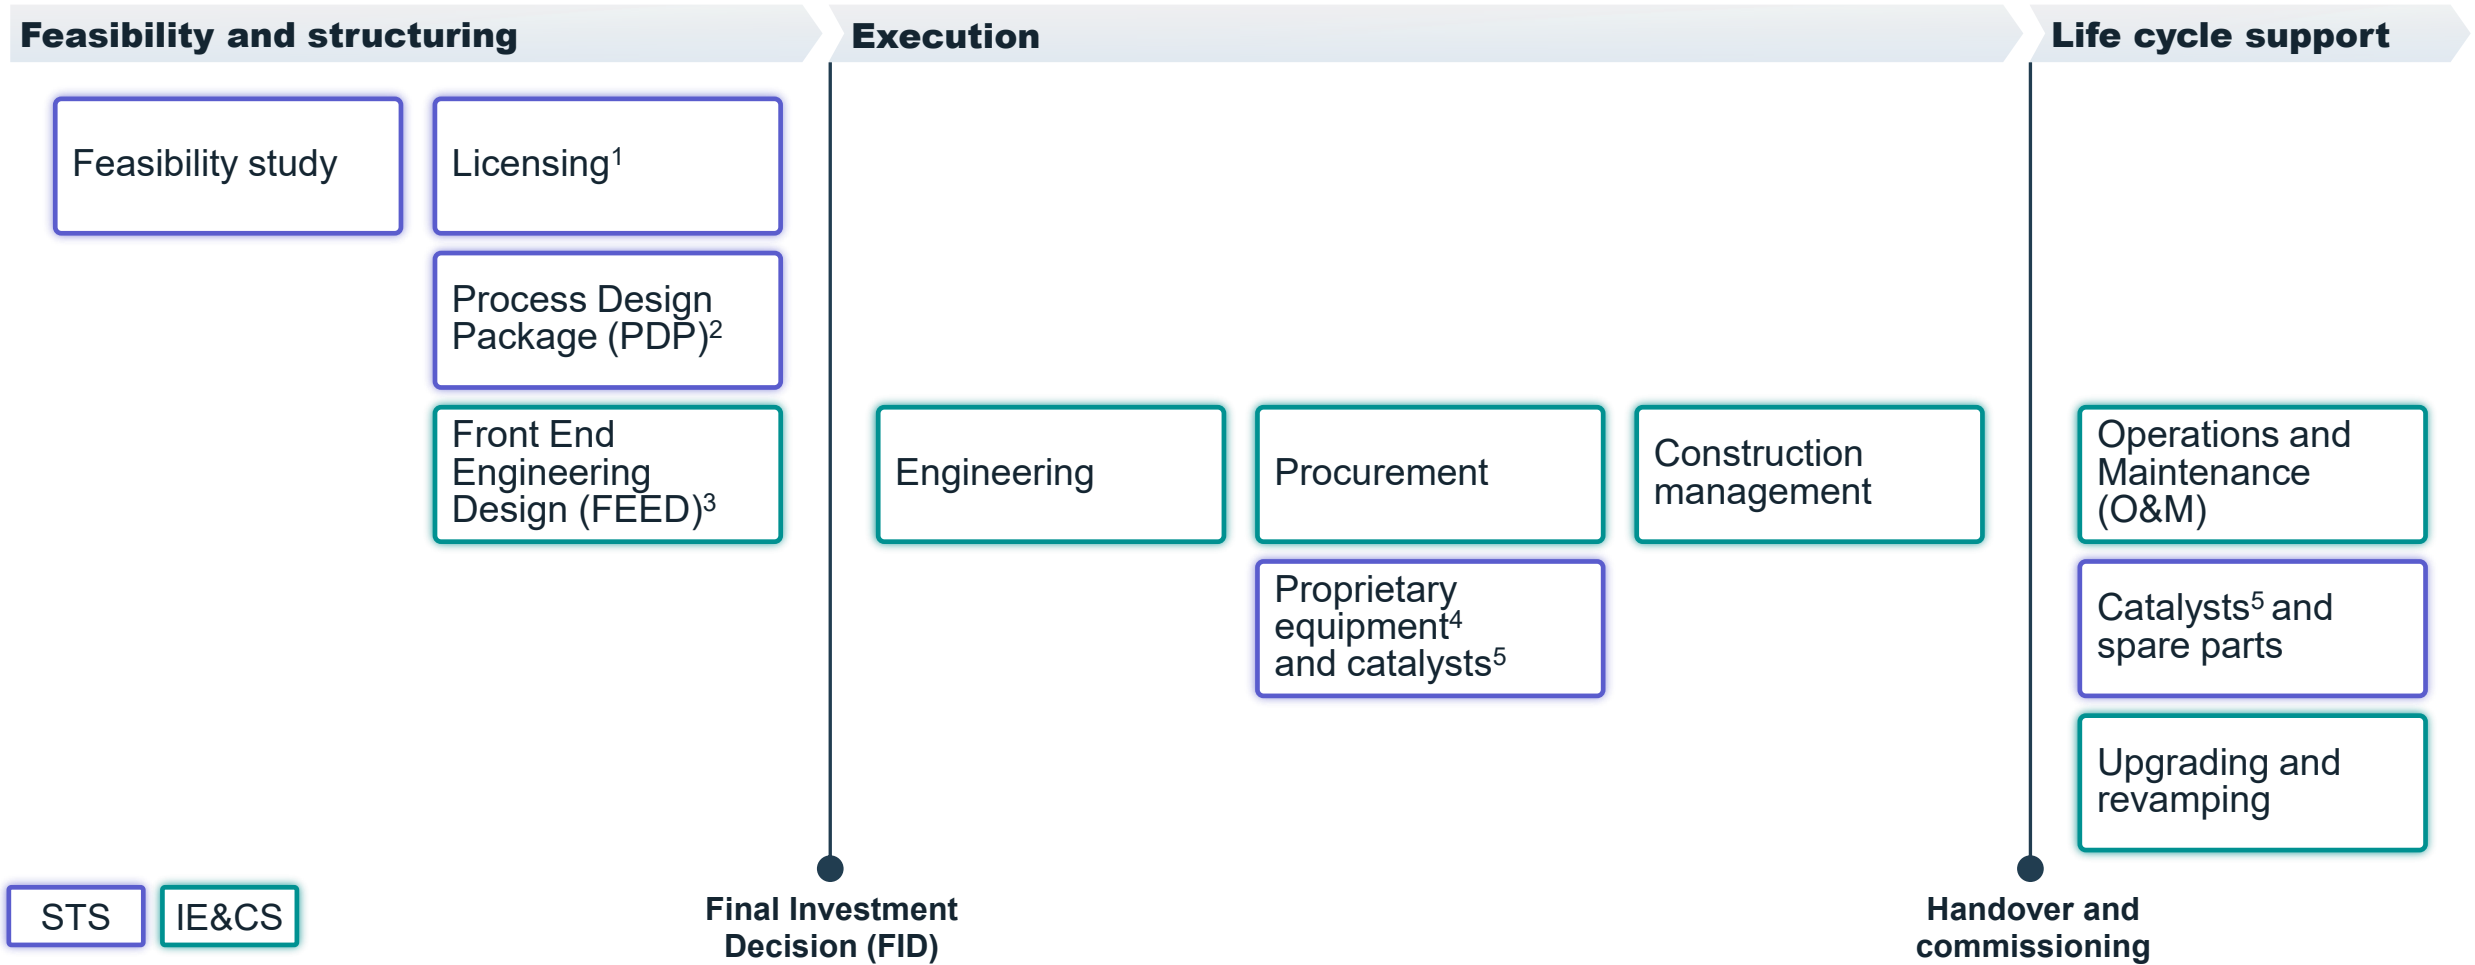

TECNIMONT
Project execution

MET DEVELOPMENT Project development
Strategic enabler

Selected equity initiatives, expertise in securing
financing, permits & grants, industrial partnerships

A FULLY-INTEGRATED ENERGY SERVICES PLAYER

MAIRE GROUP'S PRESENCE ACROSS THE ENTIRE VALUE CHAIN

1. Fee-based sale of the right to use a proprietary technology. 2. Aimed at defining the optimal process configuration of the licensed technology. 3. Aimed at defining the technical requirements, basic engineering and investment cost for the project. 4. Supply of specialized equipment designed by Nextchem's companies holding exclusive rights or patents to the technology used and produced by specialized third-party suppliers. 5. Substances which speed up a chemical reaction, to be replaced every 12-24 months.

02

THE OPPORTUNITY: A RESHAPED ENERGY SCENARIO

FROM ENERGY SUBSTITUTION TO SUSTAINABLE ENERGY ADDITION

STRUCTURAL DEMAND CALLS FOR A MULTI-SOURCE MODEL

Demographics and economic growth

	TODAY		2050
WORLD POPULATION (bn people)	8.2	+1.5bn	9.7
WORLD GDP (\$tn)	196	+2x	385

Consumption rebalancing across geographies

TODAY	2050
<45% of the global population consuming 80%+ of global energy	Growth in energy demand coming from India, South-East Asia and Africa

ELECTRIFICATION AND AI POWER DEMAND

	TODAY		2050
POWER DEMAND (thousands of terawatt-hours)	27	+2x	59

MOBILIZING EVERY ENERGY SOURCE IS ESSENTIAL TO ENSURE SECURITY, AFFORDABILITY AND SYSTEM RESILIENCE

Sources: United Nations Population Division (UNPD), IEA World Energy Outlook 2025, McKinsey's Global Energy Perspective 2025.

A DECADE OF ACCELERATION

INSTALLED CAPACITY SET TO DOUBLE AGAIN BY 2035

INSTALLED CAPACITY (TW)

WHAT'S BEHIND THIS DOUBLING?

ENERGY
more than renewables

Stable base load requires gas and LNG today, new-generation nuclear and advanced fuels tomorrow

CHEMISTRY
drives electrification

Stable grids, batteries and storage scale-up through polymers, phosphorus, lithium and fluorine

MATERIALS
set the ceiling

Capacity growth relies on strategic and critical raw materials such as copper, sulfur and minerals

CIRCULARITY
closes the loop

Managing the global carbon budget in a resource and emissions constrained world

AN ENORMOUS MARKET POTENTIAL FOR MAIRE

Source: IEA World Energy Outlook 2025, Current Policies Scenario (CPS).

A RESHAPED SCENARIO

A NEW ENERGY PARADIGM BUILT ON TWO STRUCTURAL REALITIES

MULTI-SOURCE ENERGY SYSTEM

Oil, gas, renewables, nuclear and low-carbon solutions are **complementary**, not mutually exclusive

- Secure supply
- Support industrial growth
- Reflect regional and sector-specific needs

- Economic and geopolitical priorities
- Regulatory frameworks
- Capital availability

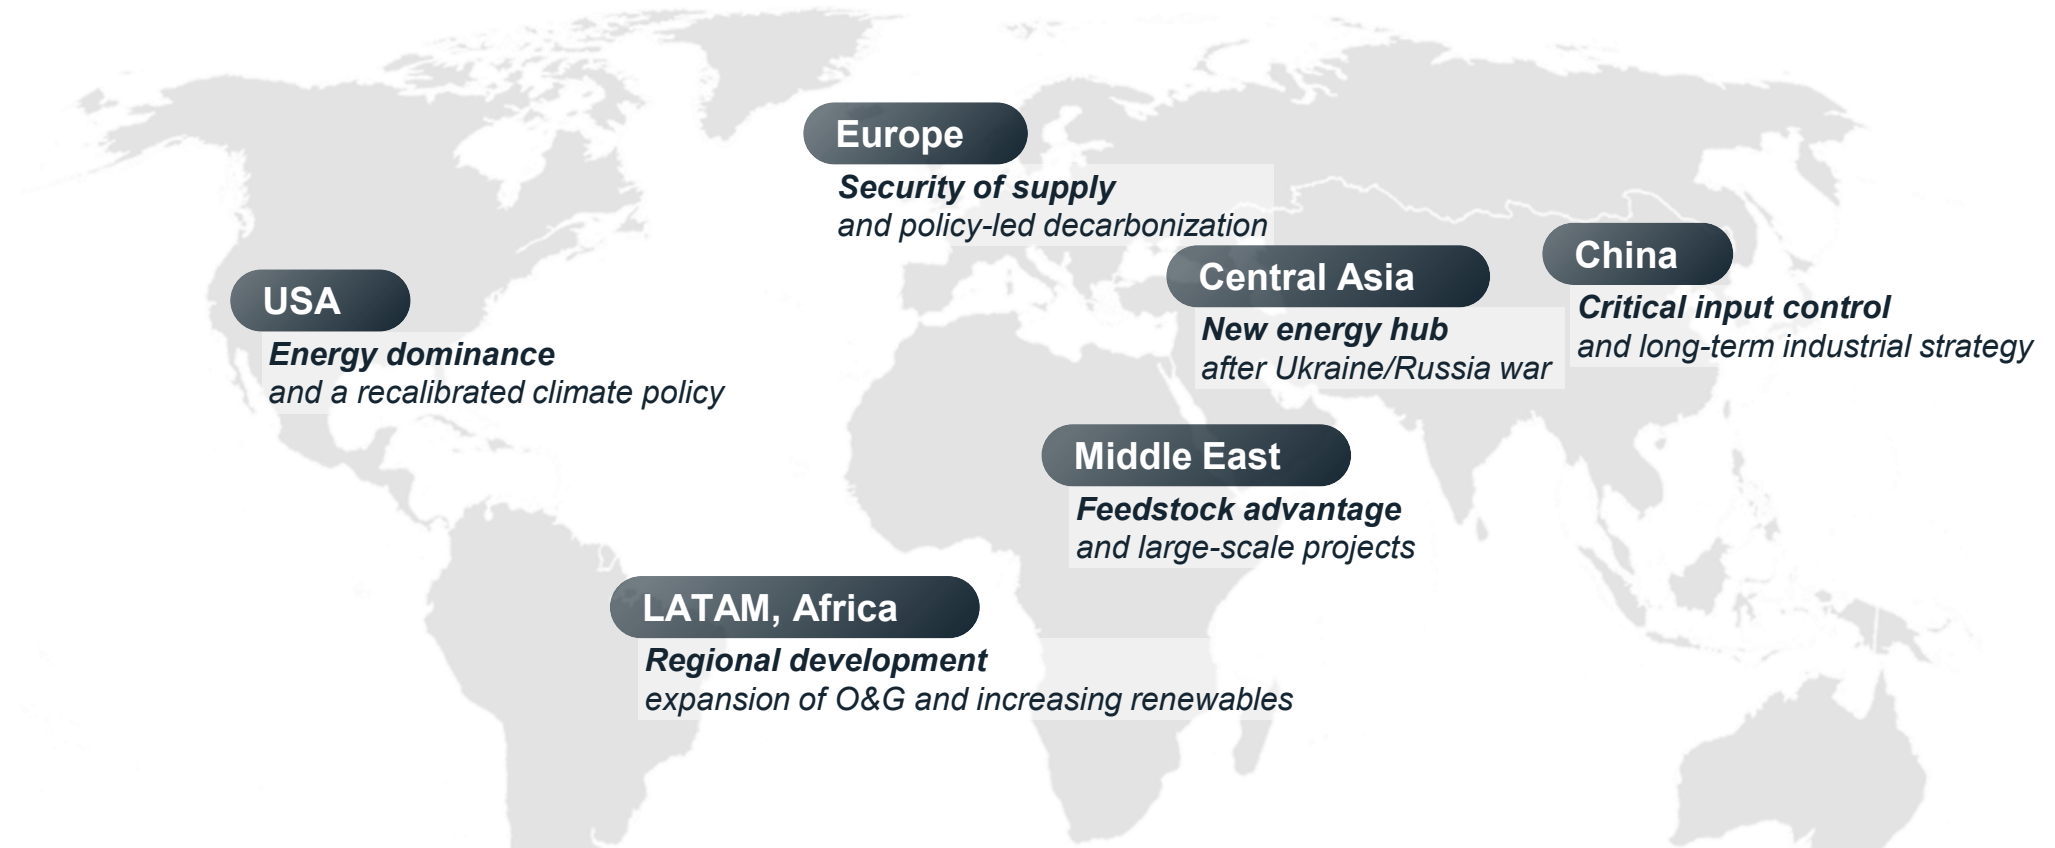

MULTI-SHAPE TRANSITION

Progressing at **different paces** and through different **pathways** across geographies, sectors and value chains

A PRAGMATIC, DIFFERENTIATED APPROACH
ANCHORED IN REAL DEMAND AND REAL-WORLD CONSTRAINTS

THE RISE OF A MULTI-SHAPE PARADIGM

DRIVEN BY ENERGY SECURITY AND GEOECONOMICS

DIFFERENT REGIONS, DIFFERENT ENERGY PATHWAYS.
ONE GLOBAL TECHNOLOGY AND ENGINEERING PARTNER: **MAIRE**

DESIGNED FOR COMPLEXITY

AN ENGINEERING DNA BUILT TO ADAPT AND SCALE

WHAT CLIENTS NEED

Flexibility to operate across geographies, technologies and transition speeds

Deployable, reliable solutions embedding decarbonization and energy efficiency

Engineering partners able to **handle complexity at scale**

WHERE MAIRE'S DNA COMES IN

An asset-light, people-driven model where **AI** enhances operational excellence and innovation

Enabling efficiencies and competitiveness

Expertise driven by a **broad technology portfolio** and process design capabilities

Expanding from low-carbon and circular solutions to chemistry of critical raw materials

A long-standing **track record** built on large, complex projects

Ready to apply our competences beyond O&G, power and petrochemicals

TURNING ENERGY CHALLENGES INTO SCALABLE, PRAGMATIC SOLUTIONS
POWERED BY AI

03

NEXTCHEM: THE FUTURE YOU WANT TO SEE

AN UNMATCHED BREADTH OF TECHNOLOGY SOLUTIONS

THE MOST COMPLETE OFFERING OF FERTILIZERS

EXPANDING IN POTASSIUM AND PHOSPHATE FOR NPK NUTRIENTS

MARKET DRIVERS

Boost crop yields
for efficient agriculture

Phosphate and
potassium nutrients

Demographic
expansion

Urea and nitrates

Low-carbon
fertilizer building block

Ammonia for fertilizers

~€200BN OVERALL MARKET CAPEX¹
IN THE NEXT 10 YEARS

CONTINUED GROWTH POTENTIAL
FOR THE FERTILIZERS SECTOR

 **VIDEO: what does it take to feed more with less?**

 Contribution of Ballestra Group from the closing of the acquisition, expected in Q2 2026.

1. Including investments in new plants, replacements, revamping and maintenance. Sources: IFA (International Fertilizer Association), Tecnimont's estimates; 2. NPK, i.e., Nitrogen (N), Phosphorus (P) and Potassium (K).

NEXTCHEM'S SOLUTIONS

Phosphate-based fertilizers

Phosphorus-rich nutrients for efficient agriculture

Specialty fertilizers

NPK² fertilizers for high nutrient delivery

Traditional fertilizers

nitrates and urea maximizing crop yield

→ Global market leader in urea technology licensing

Low-carbon fertilizers

nitrates and blue ammonia → Enhanced to cover all the scales,
from 50 to 3,500 mtpd, fully integrated
with proprietary hydrogen suite

Green fertilizers

carbon-free ammonia

FUELS AND ENERGY STORAGE LEADING GROWTH

EXPANDING PORTFOLIO INTO SULPHURIC ACID AND FLUORINE

MARKET DRIVERS (CAGR 2024-2040)

SHORT-TO-MEDIUM TERM POTENTIAL

Clean energy storage → Fluorine as electrolyte enabler +20-21%

Aviation emissions reduction → SAF +23-25%

• Strong expected growth driven by existing regulation

MEDIUM-TO-LONG TERM POTENTIAL

Low-carbon power and energy vectors → Low-carbon hydrogen and ammonia +39-40%

Maritime industry decarbonization → Methanol as fuel +33-35%

• Full-speed deployment pending IMO Net-Zero Framework approval

 [VIDEO: what does it take to make electrification possible?](#)

+ Contribution of Ballestra Group from the closing of the acquisition, expected in Q2 2026.

Sources: S&P Global data extracted as of January 2026, S&P Global Fertecon Ammonia Outlook 2025, BNEF New Energy Outlook 2025, BNEF Aviation Fuel Outlook 2026, S&P Global Fluorspar, Fluorosilicic Acid (FSA), Hydrofluoric Acid (HF) and Inorganic Fluorine Compounds, Growth Global Insights as of January 2026.

NEXTCHEM'S SOLUTIONS

Fluorine

building block for power storage and electromobility

Sulphuric acid

enabler of [metal production](#) for e-infrastructure

↳ Unlocking new clients in the metals & mining industry

Traditional fuels

minimizing environmental impact

Low-carbon fuels

valorizing gas with carbon capture

Circular and bio-fuels

leveraging waste and biomass as feedstock

E-fuels

from green hydrogen and recycled CO₂

EXPANDING SUSTAINABLE AND CIRCULAR MATERIALS

ADVANCING METAL RECYCLING TO VALORIZE ELECTRONIC WASTE

MARKET DRIVERS (CAGR 2024-2040)

High-performance cleaning solutions	➤ Biosurfactants	+3-5%
Recovery of critical raw materials from e-waste	➤ Metal recycling	+5-6%
Production of sustainable plastic	➤ Bioplastics ¹	+4-6%
Industrial-scale recycling of clean waste streams	➤ Mechanical recycling	+5-6%
From hard-to-recycle to virgin-quality	➤ Chemical recycling	+27-29%

[VIDEO: what does it take to valorize e-waste?](#)

Contribution of Ballestra Group from the closing of the acquisition, expected in Q2 2026.

Sources: BNEF Petrochemical Feedstock Demand Outlook 2025, The Global E-Waste Monitor 2024, Global Markets Insights Lithium-Ion Battery Recycling Market Report, Global Market Insights Biosurfactants Market Report.

1. Include biobased and biodegradable plastics.

NEXTCHEM'S SOLUTIONS

Biobased detergents

quality and efficiency in consumer goods

Metal recycling

from e-waste to precious metals recovery

Advanced polymers

abate polymer emission production

Bioplastics

biodegradable and biobased plastics

Mechanical recycling

upcycling plastic around consumer needs

Chemical recycling

recycling plastic into virgin-quality monomers

READY TO UNLEASH THE NUCLEAR POTENTIAL

ENABLING CLEAN POWER AND SUPPORTING THE E-FACTORY FOR CHEMISTRY MODEL

NEXT-N

Conventional island and balance of plant

to convert thermal energy into electricity for

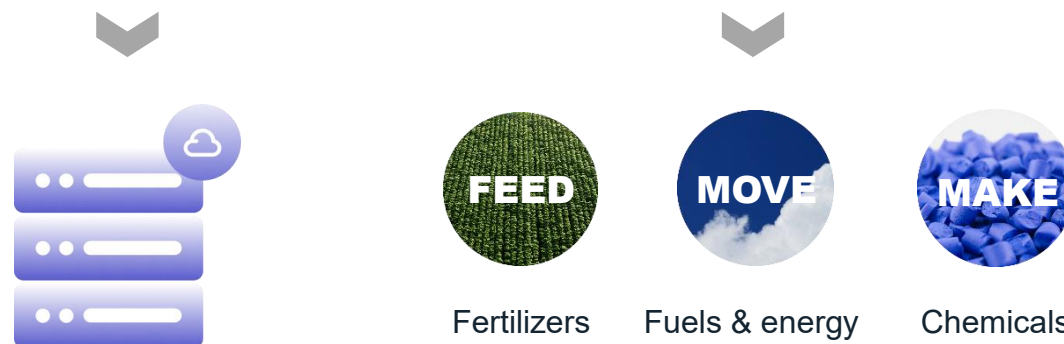

NEW-GENERATION NUCLEAR PLANTS

Technology neutral
Based on best available SMRs and AMRs from multiple providers¹

- IP and engineering services to develop the process design
- Design of proprietary and critical equipment
- Supporting the development of the new nuclear supply chain

THE E-FACTORY

safe, reliable and competitive energy supply for

Power
for data centers
and other uses

Carbon-neutral chemistry
integrated with Nextchem's
technologies

1. SMR: Small Modular Reactor; AMR: Advanced Modular Reactor.

with gas projects supporting visibility in the first years

EBITDA (€m)

Growing **profitability**
benefitting from large-scale projects and EPC innovation

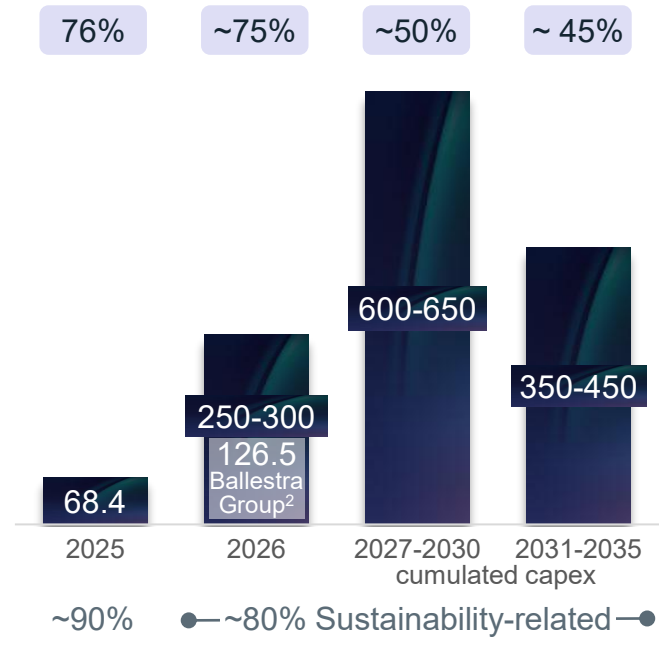

Growth % Margin

Note: FY 2022 pro forma figures.

GROUP CAPEX AND NET CASH

CAPITAL ALLOCATION SUPPORTING GROWTH AND SHAREHOLDER RETURNS

CAPEX¹ (€m)

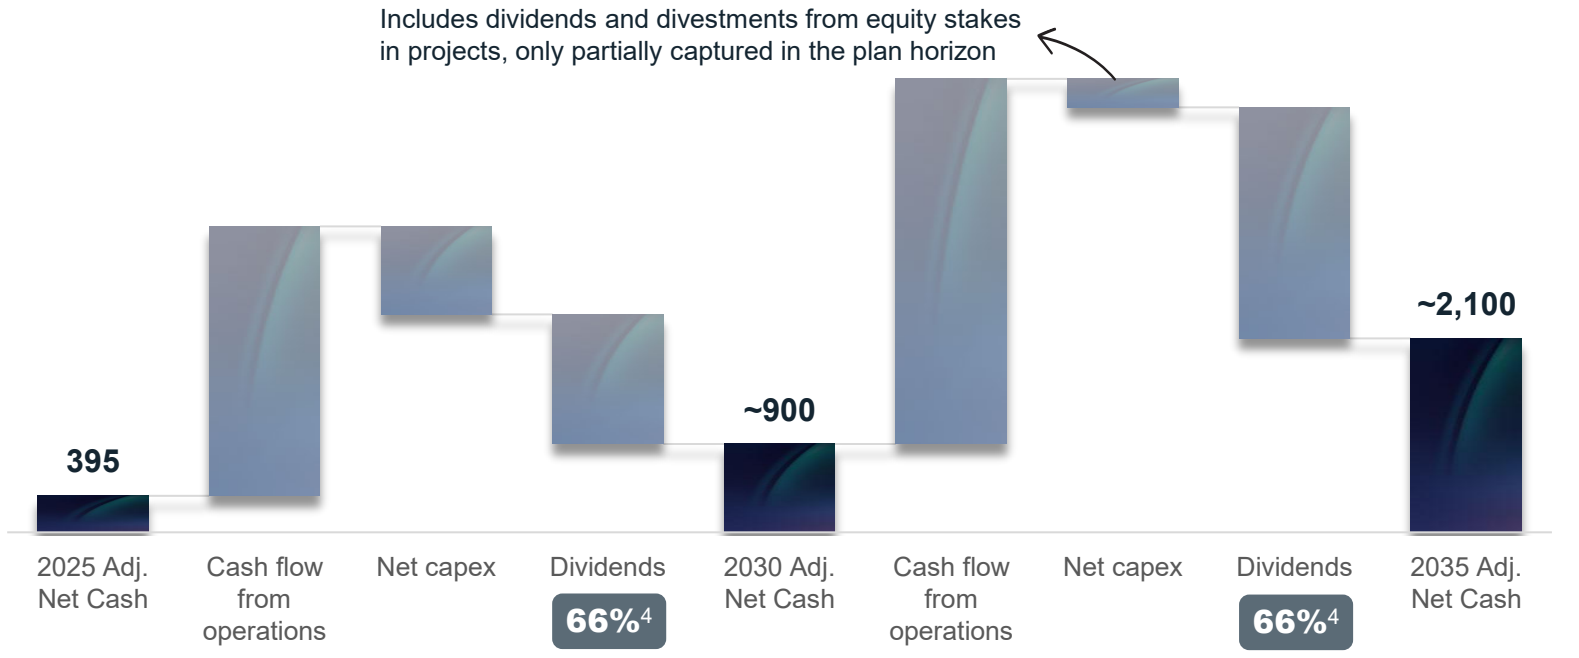

Total €1.2-1.4bn
for technology solutions and innovation

% STS

Capex not including potential transformational M&A transactions. Sustainability-related capex are defined as the sum of transitional and sustainable investments; please refer to the slide in appendix for the criteria used in the determination of transitional and sustainable work. 1. Gross amount not including dividends and divestment proceeds from equity investments in projects. 2. Final consideration subject to adjustments at closing of the acquisition, expected in Q2 2026. 3. Adjusted Net Cash excludes leasing liabilities – IFRS 16 and other minor items. Net capex includes project dividends and divestments. 4. Pay-out assumptions.

ADJUSTED NET CASH³ (€m)

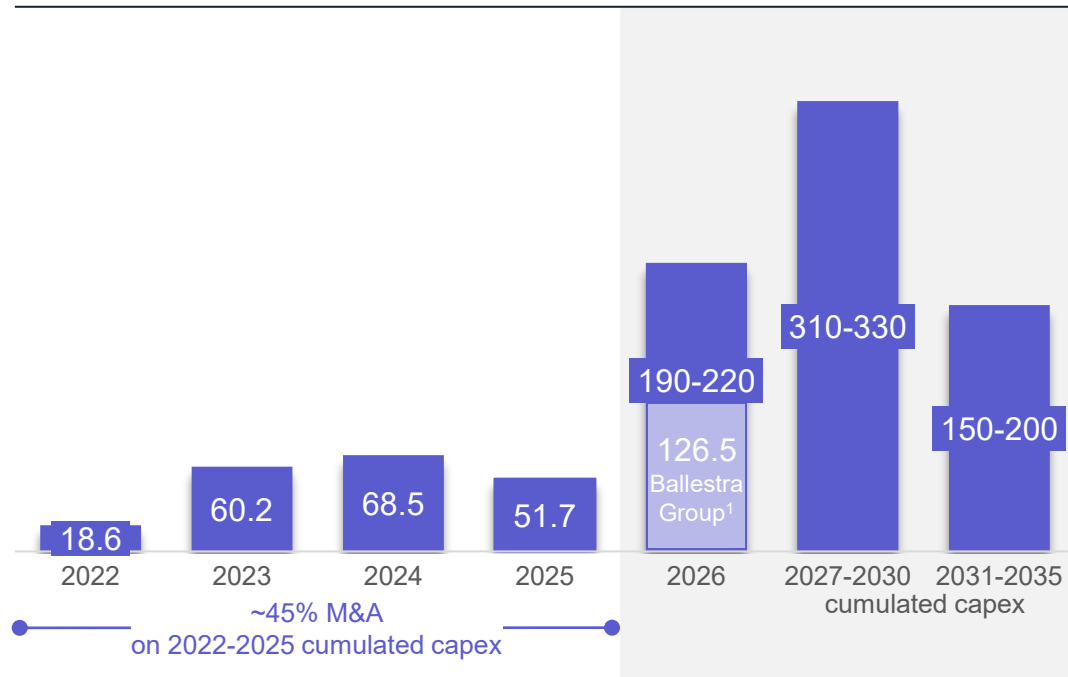

Operating cash flow
comfortably supports capex, debt service and dividends

STS CAPEX

INVESTING TO SHAPE THE TECHNOLOGIES OF TOMORROW

CAPEX (€m)

Total capex of **€650-750m**
concentrated in the first five years of the plan

Bolt-on M&A

40-60%

- EBITDA-generating targets ➤ Value accretive
- Deferred price and earn-outs ➤ Pay for performance

Technology validation

30-40%

- Bridging pilot plants to full industrial-scale
- Enabling global technology deployment

Recurring R&D²

10%+

- Driving continuous efficiency enhancement
- Expanding digital capabilities

FY 2022 pro forma figures. Capex not including potential transformational M&A transactions. Deferred price and earn-out components related to M&A transactions are included at closing of the transactions and may result in a cash outflow in the following periods. 1. Final consideration subject to adjustments at closing of the acquisition, expected in Q2 2026. 2. Recurring R&D investments to be capitalized.

IE&CS CAPEX

SHAPING THE NEXT EVOLUTION OF TECNIMONT

CAPEX (€m)

Total **€550-650m** capex concentrated in the first years of the plan

Pioneering EPC innovation

20-30%

- Digital transformation
- “Cosmont” new construction model

MET Development’s co-investments¹

40-50%

- Minority investments in integrated projects
- Double-digit target return
- Exit 2 years after project completion

Recurring investments

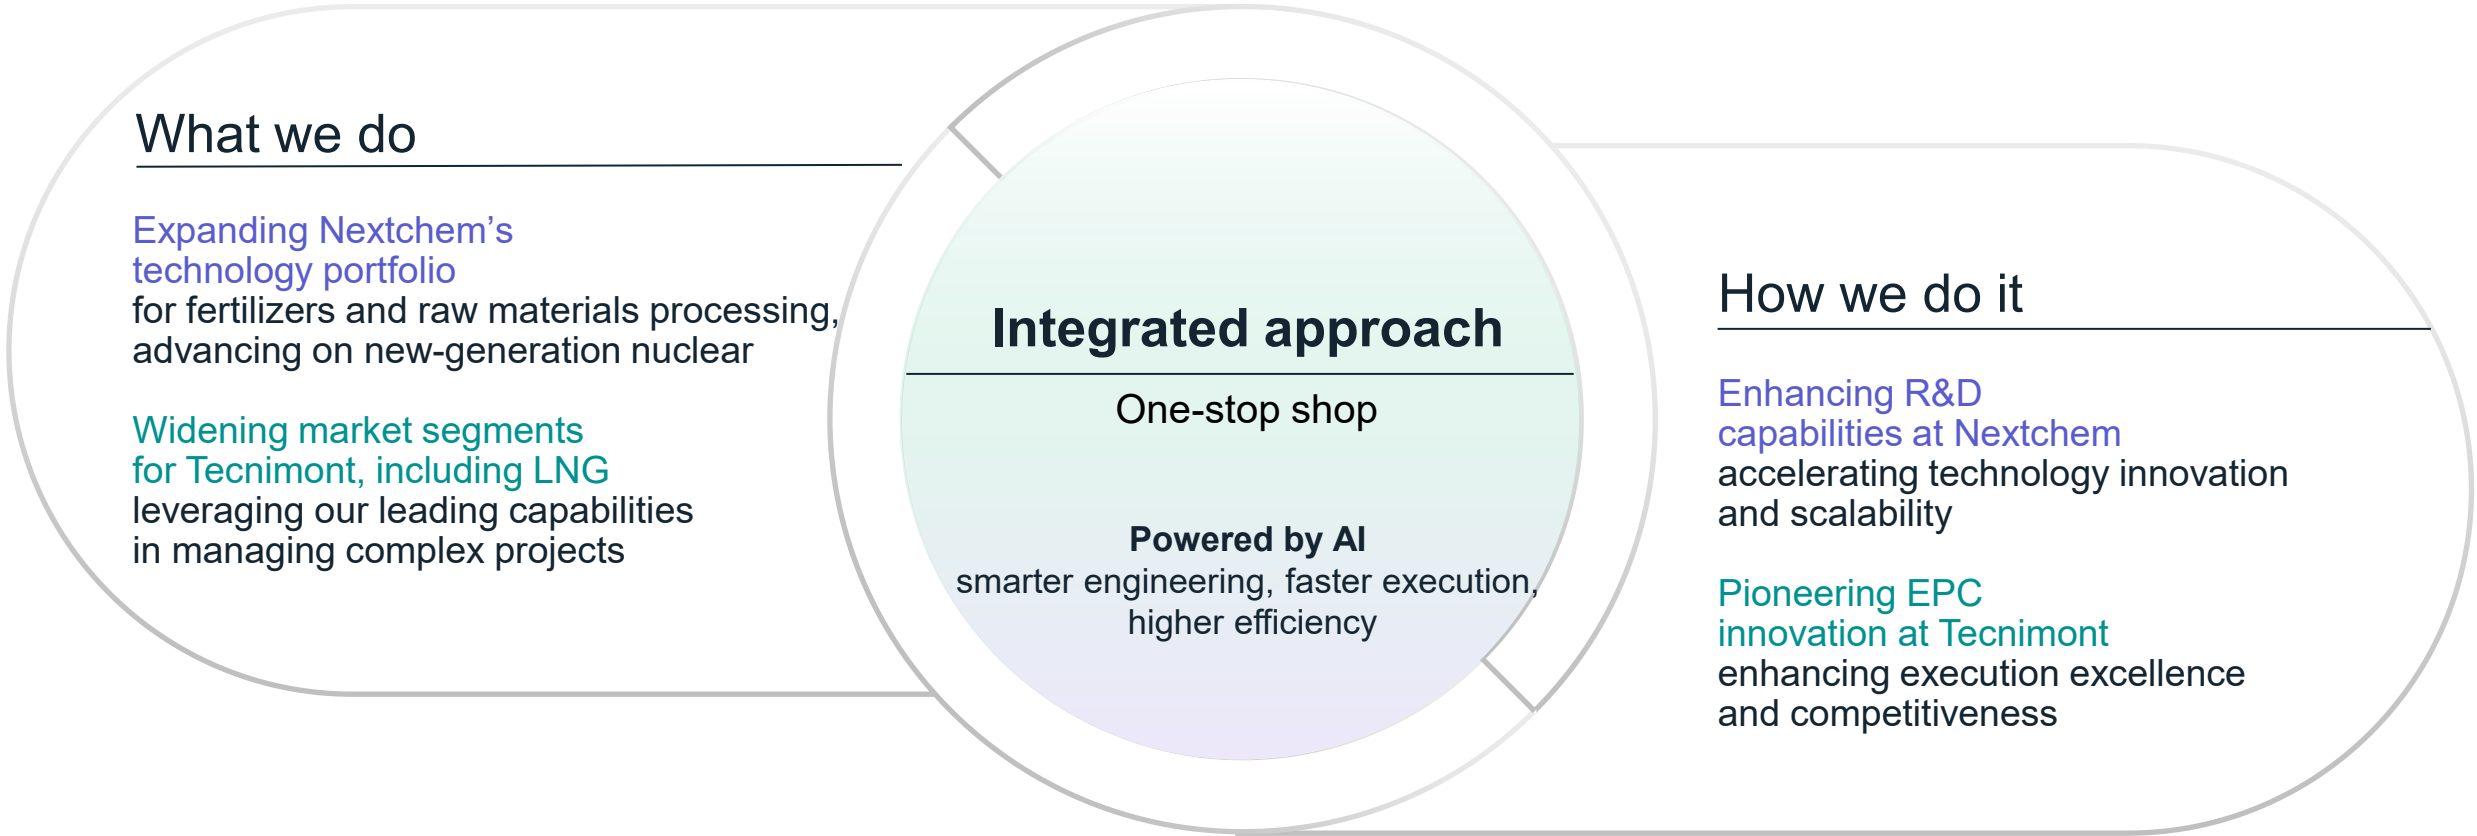

10%+

- MET Zero plan to lower emissions
- Energy efficiency program

FY 2022 pro forma figures. Capex not including potential transformational M&A transactions. 1. Gross amount not including dividends and divestment proceeds from equity investments in projects.

RESHAPING OUR ENERGIES

OUR STRATEGIC RESPONSE TO A MULTI-SOURCE, MULTI-SHAPE, GROWING ENERGY SCENARIO

MAIRE STOCK INFORMATION

Listed on the Milan Stock Exchange since November 2007

ISIN code: IT0004931058

Ticker: MAIRE

Market Capitalization on 30 April 2026: €5.2bn

€629m

Dividends distributed since 2014

+1,255%

Total return³ 1 January 2014 – 30 April 2026
+24% annual equivalent

1. Based on the latest official information communicated to MAIRE (e.g., shareholders' register, official filings). 2. Pursuant to Article 120, Paragraph 1 of the Legislative Decree no. 58 of 24 February 1998 (Italian "Consolidated Law on Finance") and to Article 6-bis of the By-Laws ("Voting right increase"), share capital of MAIRE refers to the total number of voting rights equal to 664,770,700. 3. Total return calculated as price performance plus dividends.

SUSTAINABILITY-RELATED WORK FRAMEWORK

BASIS OF PREPARATION

- We categorize our work under three types – Sustainable, Transitional or Traditional – in relation to the contribution to decarbonization and circularity objectives
- We make this classification based on management's evaluation considering life-cycle assessments of technologies and/or specific project characteristics
- Sustainability-related backlog, revenue and capex are calculated aggregating items categorized as Transitional or Sustainable

SUSTAINABLE

Includes hydrogen and hydrogen derivatives¹ from electrolysis (green and pink), e-fuels, biofuels, SAF, bioplastics from bio-feedstock, plastic upcycling, chemical recycling (depolymerization), Waste-to-X (gasification), renewables and nuclear energy

TRANSITIONAL

Includes gas processing with carbon capture, LNG, low-carbon hydrogen and hydrogen derivatives¹ (blue), carbon capture, biodegradable plastics from fossil feedstock, Ultra-Low Energy urea and nitric acid, phosphate- and potassium-based fertilizers, specialty and NPK² fertilizers, fluorine technologies

TRADITIONAL

All other market segments, including, for example: oil refining, chemicals, petrochemicals, hydrogen and hydrogen derivatives¹ produced without carbon capture (grey), sulphur recovery units, traditional urea, sulphuric and phosphoric acid, soaps and detergents

Not subject to third-party assurance. 1. Including ammonia and methanol. 2. NPK, i.e., Nitrogen (N), Phosphorus (P) and Potassium (K).
